PROJECTS

Data Structures Implementation *Java, Data structures and Algorithms*

• Implemented a library of basic data structures including; Linked lists, Stacks, Queue, Min Heap, Binary Search Trees, using JAVA for my course project. Demonstrated proficiency in algorithm development and data structure manipulation, ensuring optimal performance and functionality. Implemented my knowledge of the big O notation in order to maximize efficiency and increase runtime speed.

Dating App *MATLAB*

• Created a dating app alongside group members as a term project. App matched potential matches according to their pet preferences. I contributed by designing the app's web interface, and also contributed to the brainstorming behind the app mode of match making, which ended up being according to pet preferences.
